TO WHOM IT MAY CONCERN

Ref: GF1603/Jun2016/SHW/M&E/gk

Dear Sir

Re: RECOMMENDATION LETTER HELIOS AGROSOL LIMITED

Background

As an introduction, Gamma Delta Eastern Africa Limited was incorporated in 2003, having assumed the business of a 20-plus year old company trading as Gamma Delta Company Limited. Gamma Delta is an established name primarily serving the Engineering Services Sector both in the Power and Construction Industry within the region.

The Contractor

We have been informed by the above referenced company that they are desirous of a letter of recommendation which we are glad to provide.

We confirm that Helios Agrosol Limited is well known to us as a Category 1 supplier of solar hot water equipment.

Having worked with them on several installations in apartments and single residential, we confirm that their equipment is of world class quality and their competence and technical knowhow above reproach.

With the proliferation of sub-standard panels or matching of local untested solar tanks with imported panel the supplier has maintained their supply from their reputable principals who have been at hand to install newer technology and to provide design improvements to ensure optimal heating and reduction in heat loss.

Performance

The supplier has completed all installations awarded to them with the utmost professionalism and has been responsive where we have faced challenges during testing, commissioning or in the normal running of the units where some systems are not well configured.

Due to the sensitivity of the solar installations and the possible pressure build up, we have found Helios Agrosol well aware of these dangers and keen to ensure that installations are safe for use, relieve any potential excess pressure and avoid accidental scalding placing them among our preferred equipment suppliers for our clients.

Recommendation

We hence recommend Helios Agrosol without reservation for similar installation.

Yours sincerely,
For: Gamma Delta Eastern Africa Limited
